12 months ended 30 September 2025

Introduction

Firstgas is part of the Clarus group of companies which is one of New Zealand's largest energy groups with businesses that touch many aspects of the energy supply chain including Rockgas, Firstgas, Firstlight Network, First Renewables and Flexgas. Whether it's transmission, distribution, supply or storage of energy, the companies within the Clarus group service over half a million homes and businesses of all sizes around New Zealand.

Firstgas owns and operates more than 2,500 kms of high-pressure gas transmission pipelines and stations that supply natural gas from Taranaki to industrial consumers throughout the North Island. It also owns 4,800kms of gas distribution networks across parts of the North Island. Combined, Firstgas connects over 300,000 homes and businesses with natural gas through its transmission and distribution systems. This essential infrastructure supports New Zealand's economy, so the group is committed to helping customers maximise value from it. Flexgas provides energy storage services to electricity generators, offering an important source of flexibility to the electricity system and supporting high levels of intermittent wind, hydro and solar generation.

Rockgas is New Zealand's largest LPG retail supplier, providing fast and reliable service through a national network of branches and franchises.

Firstlight Network is the lines company supplying electricity to the Tairāwhiti and Wairoa region, responsible for keeping the lights on across 12,000 square kilometres of the East Coast.

We are also investing in innovative renewable energy solutions such as biomethane and hydrogen, to help New Zealand reach its net zero carbon goals by 2050. Our First Renewables business is leading this work, alongside other options that will bring renewable energy to New Zealand homes, businesses and energy-intensive industries in the future.

Clarus was previously known as Firstgas Group.
