

## When is gas the best way to heat your home?

Having a warm, dry home is vital to your health and happiness – but what's the best way to heat your house?

There's no single right answer, because the best choice will depend on your life, your house and your preferences. Here's when gas heating can offer real benefits:

### When you want stylish warmth that enhances a room

- **Gas fireplaces offer both style and comfort** - They create a warm, inviting focal point - much like a wood burner, and bring a cosy atmosphere to any room.
- **Versatile in design** - They can be wall-mounted, suspended, outdoor, or even double-sided.
- **Sleek and architectural** - Gas fireplaces add value and sophistication. Let's be honest - you won't see a heat pump featured on Grand Designs.

### When you want instant heat to fill the room quickly

Gas delivers instant, powerful warmth unlike electric heating, gas heats a room quickly. It is perfect for holiday homes or when you need fast comfort.

No waiting, no timers. Just reliable heat on demand. You can control the temperature easily, and yes, you can even hang your Christmas stockings over the fire.

### When you want radiated heat for maximum comfort

Gas radiator heating offers whole-home comfort. It delivers consistent, even warmth throughout your space, quietly and efficiently unlike heat pumps that blow hot air.

### Could gas be right for you?
