

# Firstgas

## Instant heat, instant ambience.

Gas home heating delivers instant warmth with style, but the best solution will always depend on the property, how it's used, and your customer's performance expectations. Whether it's a new build or retrofit project, gas heating provides your customers with responsiveness, design flexibility, and reliable performance.

### Instant, reliable heat

Gas delivers instant warmth, so spaces feel ready to enjoy straight away – no waiting, no pre-heating. Gas heating provides consistent temperature control and responsive performance – reliability your customers will notice straight away.

#### Ideal for:

- New builds and retrofits
- Any property where homeowners want heat on demand
- Large or open plan living spaces
- Holiday homes

### Heating with style

Gas fireplaces deliver effective heating with strong visual appeal, creating ambience and an architectural focal point, whether it be wall-mounted, suspended, outdoor, or double-sided units.

#### Benefits:

- Performance and design combined
- Convenient, instant, low-maintenance operation
- Flexible installation options to suit any home design
- Suitable for retrofits and new builds
- Elevates interior finish and value

### Radiated heat for max comfort

Gas radiator systems deliver whole home heating performance, so they're a practical option for both new builds and retrofits where consistent, ambient warmth is preferred.

#### Benefits:

- Even, consistent warmth throughout all rooms
- Quiet operation with no forced air movement
- Efficient heat delivery without drafts or temperature swings

### Complete home energy solutions

Gas heating works seamlessly alongside hot water and cooking to create a connected home energy solution. All while delivering the instant warmth and ambience your customers will notice from the moment they step inside.
