Firstgas

Information disclosure for the gas transmission business

Year ending 30 September 2018

First Gas Limited 28 February 2019

Introduction

First Gas operates 2,500km of gas transmission pipelines (including the Maui pipeline), and more than 4,700km of gas distribution pipelines across the North Island. These gas infrastructure assets transport gas from Taranaki to major industrial gas users, electricity generators, businesses and homes, and transport around 20 percent of New Zealand's primary energy supply.

For further information on First Gas, please visit our website www.firstgas.co.nz.

Information disclosure

This document contains First Gas' annual information disclosure for the gas transmission business, for the year ending on 30 September 2018, as required by the *Gas Transmission Information Disclosure Determination (No.1) 2017* consolidating all amendments as of 14 June 2017("the Determination") issued by the Commerce Commission.

The following documents are provided with this information disclosure:

- Schedules 1 10: Financial and technical schedules
- Schedules 14 15: Mandatory and voluntary explanatory notes
- Schedule 19: Director certification
- KPMG assurance report

This information disclosure was prepared on 28 February 2019.

Further information

Disclaimer

For presentation purposes, some numbers in the information disclosure schedules have been rounded. This may cause small discrepancies or rounding inconsistencies when aggregating some of the information presented in the information disclosure schedules. These discrepancies do not affect the overall compliance calculations which are based on the more detailed information.

Company Name First Gas Limited (Transmission) For Year Ended 30 September 2018 SCHEDULE 6a: REPORT ON CAPITAL EXPENDITURE FOR THE DISCLOSURE YEAR This schedule requires a breakdown of capital expenditure on assets incurred in the disclosure year, including any assets in respect of which capital contributions are received, but excluding assets that are vested assets. Information on expenditure on assets must be provided on an accounting accruals basis and must exclude finance costs. GTBs must provide explanatory comment on their expenditure on assets in Schedule 14 (Explanatory notes to templates). This information is part of audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8. sch ref 6a(vii): Legislative and Regulatory 85 86 (\$000) (\$000) 87 22 89 90 91 92 * include additional rows if needed 93 All other projects or programmes - legislative and regulatory 94 Legislative and regulatory expenditure Capital contributions funding legislative and regulatory 96 Legislative and regulatory less capital contributions 97 6a(viii): Other Reliability, Safety and Environment 98 99 Project or programme* (\$000) (\$000) 100 101 102 103 104 105 * include additional rows if needed 106 All other projects or programmes - other reliability, safety and environment 107 Other reliability, safety and environment expenditure 108 Capital contributions funding other reliability, safety and environment 109 Other reliability, safety and environment less capital contributions 110 6a(ix): Non-Network Assets 111 Routine expenditure 112 113 Project or programme* (\$000) (\$000) 114 Equipment 393 115 2.362 116 Vehicles 440 **Building Refurbishment** 117 578 118 119 * include additional rows if needed 120 All other projects or programmes - routine expenditure Routine expenditure 3,773 121 122 **Atypical expenditure** 123 Project or programme* (\$000) (\$000) 124 125 126 127 128 129 * include additional rows if needed 130 All other projects or programmes - atypical expenditure 131 Atypical expenditure 132 133 Expenditure on non-network assets

SCHEDULE 6b: REPORT ON OPERATIONAL EXPENDITURE FOR THE DISCLOSURE YEAR

This schedule requires a breakdown of operational expenditure incurred in the disclosure year. GTBs must provide explanatory comment on their operational expenditure in Schedule 14 (Explanatory notes to templates). This includes explanatory comment on any atypical operational expenditure and assets replaced or renewed as part of asset replacement and renewal operational expenditure, and additional information on insurance.

This information is part of audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8.

SCHEDULE 7: COMPARISON OF FORECASTS TO ACTUAL EXPENDITURE

This schedule compares actual revenue and expenditure to the previous forecasts that were made for the disclosure year. Accordingly, this schedule requires the forecast revenue and expenditure information from previous disclosures to be inserted.

GTBs must provide explanatory comment on the variance between actual and target revenue and forecast expenditure in Schedule 14 (Mandatory Explanatory Notes). This information is part of the audited disclosure information (as defined in section 1.4 of the ID determination), and so is subject to the assurance report required by section 2.8. For the purpose of this audit, target revenue and forecast expenditures only need to be verified back to previous disclosures.

Company Name First Gas Limited (Transmission)

For Year Ended 30 September 2018

Schedule 14 Mandatory Explanatory Notes

- 1. This schedule requires GTBs to provide explanatory notes to information provided in accordance with clauses 2.3.1, 2.4.20 and sub-clause 2.5.1(1)(e).
- 2. This schedule is mandatory—GTBs must provide the explanatory comment specified below, in accordance with clause 2.7.1. Information provided in boxes 1 to 12 of this schedule is part of the audited disclosure information, and so is subject to the assurance requirements specified in section 2.8.
- 3. Schedule 15 (Voluntary Explanatory Notes to Schedules) provides for GTBs to give additional explanation of disclosed information should they elect to do so.

Mandatory explanatory notes

Return on Investment (Schedule 2)

4. In the box below, comment on return on investment as disclosed in Schedule 2. This comment must include information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 2: Explanatory comment on return on investment

This is the first disclosure year where First Gas has completed a single consolidated disclosure for its gas transmission business. Prior to this year, First Gas disclosed the results of the Maui and Non-Maui transmission businesses separately. In 2017, an amendment to the information disclosure determination was made to align the two networks to an aligned disclosure year. ¹ At the same time, the Default Price-Quality Path (DPP) that determines the allowable revenue, merged the two businesses into a single transmission price path. These two events took effect from the beginning of this disclosure year.

The Commerce Commission granted First Gas (Transmission) an exemption from reporting historic ROI results. The data collected for the separate transmission networks was difficult to convert to a meaningful ROI calculation using the 12-month period ending in September.

In 2018, the vanilla ROI for our transmission business is 7.02%. This is below the ROI reported for either of the transmission networks in 2017 (7.63% for the Non-Maui transmission system and 8.02% for the Maui transmission system). The decrease in the ROI is largely driven by the decrease in revenue between the two disclosure years. The 2017 DPP reset for the gas transmission business resulted in a decrease in prices and associated revenue for First Gas (Transmission) from 1 October 2017. This disclosure period also saw restricted gas supply due to production station outages and constraints.

¹ The Maui network was previously completed on a December year basis, and the Non-Maui based on a June year end. In 2017 we aligned both networks to a September year-end.

GAS TRANSMISSION INFORMATION DISCLOSURE DETERMINATION 2012 – (CONSOLIDATED IN 2015) – SCHEDULES 14-15

Regulatory Profit (Schedule 3)

- 5. In the box below, comment on regulatory profit for the disclosure year as disclosed in Schedule 3. This comment must include
 - a description of material items included in other regulated income (other than gains / (losses) on asset disposals), as disclosed in Schedule 3(i)
 - 5.2 information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 2: Explanatory comment on regulatory profit

There are no items of other regulated income and no reclassified items.

Merger and acquisition expenses (3(iv) of Schedule 3)

- 6. If the GTB incurred merger and acquisitions expenditure during the disclosure year, provide the following information in the box below-
 - 6.1 information on reclassified items in accordance with sub-clause 2.7.1(2)
 - any other commentary on the benefits of the merger and acquisition expenditure to the GTB.

Box 3: Explanatory comment on merger and acquisition expenditure

No merger and acquisition expenditure has been included during the disclosure year.

Value of the Regulatory Asset Base (Schedule 4)

7. In the box below, comment on the value of the regulatory asset base (rolled forward) in Schedule 4. This comment must include information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 4: Explanatory comment on the value of the regulatory asset based (rolled forward)

The value of the regulated asset base (RAB) has been determined by rolling forward the combined initial RAB's of both the Non-Maui transmission system and the Maui transmission system, with adjustments made for additions, disposals, depreciation and revaluation in accordance with the applicable Input Methodologies.

Exemptions applied to RAB

In 2018, the Commerce Commission agreed First Gas would add together the historic disclosed results for each of the transmission businesses for each of the CY-1 to CY-4 periods. Prior to 2016, the networks (Maui and Non-Maui) were owned by different entities.

For the periods CY-2 to CY-4, the Maui network had a December year end and the Non-Maui network had a June year end.

In the CY-1 period, the separate networks transitioned to a September year end. The Maui network disclosure covered a period of nine months (January 2017 to September 2017) and the Non-Maui network disclosure covered a period of 15 months (July 2016 to September 2017). The disclosed results were summed to complete the CY-1 data.

Amendment to opening unallocated RAB

For 2018, the Opening Unallocated RAB of \$824.649 million reported in Schedule 4(ii) is different to the Closing Unallocated RAB of the two transmission businesses (\$837.033 million) in 2017. The variance between the two figures of \$12.384 million is due to the:

- Effect of merging the two transmission businesses together (\$10.743 million); and
- Removal of assets directly attributable to distribution (\$1.641 million).

Effect of merging the two networks on the unallocated RAB

In the 2017 disclosures, each transmission business reported the unallocated RAB as being the directly attributable assets for the respective network, plus the not-directly attributable assets.

When completing the 2018 disclosures, First Gas notes that if the unallocated amounts were to be added together, then the not-directly attributable assets would be included in the disclosures twice. To remove the double recognition of the not-directly attributable assets, the opening balance of the unallocated RAB was reduced by \$10.743 million from that disclosed as total closing unallocated RAB for the transmission businesses in 2017.

Removal of assets directly attributable to distribution

In Schedule 4(ii), the opening unallocated RAB value is different to the closing unallocated RAB value that was disclosed in 2017. This is because in 2017, \$1.6 million of assets directly attributable to our distribution business were included in the closing unallocated RAB value for our transmission business. These distribution assets have been removed from the Unallocated RAB value for our transmission network in 2018.

Review of not-directly attributable assets

In 2018, we reviewed the not-directly attributable assets for our transmission and distribution businesses. This is because in 2017 a small number of assets directly attributable to our distribution business were included in the closing unallocated RAB value for our transmission business. These distribution assets have been removed from the unallocated RAB value for our transmission network in 2018.

Calculation of revaluation rate and revaluation of assets

Following a change in the base year by Statistics New Zealand, the opening CPI value (CPI₄-4) does not agree to closing CPI value disclosed in 2017. The opening CPI value disclosed in 2018 of 1005 reflects the Statistics New Zealand revision to the All Groups Index SE9A.

Regulatory tax allowance: disclosure of permanent differences (5a(i) of Schedule 5a)

- 8. In the box below, provide descriptions and workings of the material permanent differences included in the following items, as recorded in the asterisked categories in 5a(i) of Schedule 5a:
 - 8.1 Income not included in regulatory profit / (loss) before tax but taxable
 - 8.2 Expenditure or loss in regulatory profit / (loss) before tax but not deductible
 - 8.3 Income included in regulatory profit / (loss) before tax but not taxable
 - 8.4 Expenditure or loss deductible but not in regulatory profit / (loss) before tax

Box 5: Regulatory tax allowance: permanent differences

Permanent differences consist of immaterial non-deductible professional and entertainment expenses.

Regulatory tax allowance: disclosure of temporary differences (5a(i) of Schedule 5a)

- 9. In the box below, provide descriptions and workings of the material temporary differences included in the following items, as recorded in the asterisked categories in 5a(i) of Schedule 5a:
 - 9.1 Income not included in regulatory profit / (loss) before tax but taxable
 - 9.2 Expenditure or loss in regulatory profit / (loss) before tax but not deductible
 - 9.3 Income included in regulatory profit / (loss) before tax but not taxable
 - 9.4 Expenditure or loss deductible but not in regulatory profit / (loss) before tax

Box 6: Temporary differences

Temporary differences include immaterial movements in provisions and accruals.

Related party transactions: disclosure of related party transactions (Schedule 5b)

10. In the box below, provide descriptions of related party transactions beyond those disclosed in Schedule 5b including identification and descriptions as to the nature of directly attributable costs disclosed under sub-clause 2.3.7(2)(b).

Box 7: Related party transactions

A description of all related party transactions has been disclosed in Schedule 5b.

Cost allocation (Schedule 5d)

11. In the box below, comment on cost allocation as disclosed in Schedule 5d. This comment must include information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 8: Cost allocation

All operating costs disclosed in Schedule 5d (except some specified business support costs and pass-through costs), are directly attributable to either the First Gas transmission or distribution business. First Gas has applied the avoided cost allocation methodology (ACAM) in accordance with the applicable Input Methodologies.

Approach to cost allocation

The accounting-based allocation approach (ABAA) has been applied in accordance with the applicable Input Methodologies determination to allocate not-directly attributable costs (shared costs) between First Gas' transmission and distribution businesses. Causal cost allocators have been used where a cost driver has led to the cost being incurred.

Where a single causal allocator cannot be established for a shared cost, a proxy allocator has been used. The rationale behind the use of each proxy allocator is based on an analysis of each cost item that is not directly attributable. The key allocator that can be used as a proxy is determined by management. This is based on management's experience and knowledge, and an analysis of each of the cost areas.

Only one allocation method is used for each area.

First Gas has refined the cost allocators applied to its information disclosure accounts this year. Where possible, we have allocated the shared costs at a greater level of disaggregation than in previous years. Further information on the effect of this refinement to allocators is available in Schedule 5d of this disclosure document.

Treatment of costs

Business support costs that are not directly attributable arise in the areas of:

- Legal and consulting fees, which has a causal cost allocator of management's estimate of time spent;
- Employee-related costs such as mobile phones, stationery, travel, information technology hardware and software, and advertising for positions, which have a causal cost allocator of employee numbers;
- General expenses such as telephones, sponsorship and professional fees for audit, tax, information and technology and treasury functions which have a proxy cost allocator of the Regulatory Asset Base (RAB);
- Directors fees which has a proxy cost allocator of RAB;
- Insurance costs which has a proxy cost allocator of RAB; and
- Commerce Act levies which have a causal cost allocator of RAB.

GAS TRANSMISSION INFORMATION DISCLOSURE DETERMINATION 2012 – (CONSOLIDATED IN 2015) – SCHEDULES 14-15

Asset allocation (Schedule 5e)

12. In the box below, comment on asset allocation as disclosed in Schedule 5e. This comment must include information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 9: Commentary on asset allocation

Non-network assets that are not directly attributable have been allocated across all First Gas regulated businesses based on head count.

In 2018, we reviewed the not-directly attributable assets for our transmission business. This review identified a number of directly attributable non-network assets that had been previously considered not directly attributable.

During the 2018 disclosure period, these assets were re-classified from 'Not directly attributable' to 'Directly attributable.'

Capital Expenditure for the Disclosure Year (Schedule 6a)

- 13. In the box below, comment on expenditure on assets for the disclosure year, as disclosed in Schedule 6a. This comment must include
 - a description of the materiality threshold applied to identify material projects and programmes described in Schedule 6a;
 - 13.2 information on reclassified items in accordance with sub-clause 2.7.1(2)

Box 10: Explanation of capital expenditure for the disclosure year

A project or programme is considered material if the estimated total project cost is equal to or exceeds \$0.5 million.

There have been no re-classified items.

Focus of capital expenditure

Our focus continues to be on increasing the resilience of the transmission network. Major capital projects undertaken in this period include:

- Upgrading the Mokau Compressor Station;
- Prepatory work for the realignment of the 750 mm pipe at Gilbert Stream:
- Upgrading the Kaitoke Compressor Station;
- Upgrade of the SCADA master system;
- Protection of the Turakina River pipeline;
- Upgrade of the Horotiu delivery point; and
- Station replacement programme.

We have also continued to scope the requirements needed to upgrade our IT systems in anticipation of implementing the Gas Transmission Access Code (GTAC).

Further detail on our expenditure for this period, and our future work programme is available in our 2018 Asset Management Plan published on the First Gas website here: http://firstgas.co.nz/about-us/regulatory/transmission/

Operational Expenditure for the Disclosure Year (Schedule 6b)

- 14. In the box below, comment on operational expenditure for the disclosure year, as disclosed in Schedule 6b. This comment must include-
 - 14.1 Commentary on assets replaced or renewed with asset replacement and renewal operational expenditure, as reported Schedule 6b(i)
 - 14.2 Information on reclassified items in accordance with sub-clause 2.7.1(2)
 - 14.3 Commentary on any material atypical expenditure included in operational expenditure disclosed in Schedule 6b, a including the value of the expenditure the purpose of the expenditure, and the operational expenditure categories the expenditure relates to.

Box 11: Explanation of operational expenditure for the disclosure year

There has been no operational expenditure on asset replacement and renewal.

There have been no re-classified items.

There has been no material atypical expenditure included in the schedule.

Variance between forecast and actual expenditure (Schedule 7)

15. In the box below, comment on variance in actual to forecast expenditure for the disclosure year, as reported in Schedule 7. This comment must include information on reclassified items in accordance with sub-clause 2.7.1(2).

Box 12: Explanatory comment on variance in actual to forecast expenditure

Capital expenditure

Overall, our expenditure on assets was \$20.7 million (42%) lower than that forecast in our Asset Management Plan (AMP). This lower expenditure reflects a deferral of projects following a review of our capital works plan. The review was implemented to ensure we maximised efficient delivery, while balancing the business capacity to deliver. The major contributors to the variances are outlined below:

- Deferral of the Gas Transmission Access Code (GTAC) project to FY2019. The GIC did
 not find the first draft of the GTAC materially better than the existing commercial Codes
 (MPOC and VTC). This led to further consultation with the industry and the GTAC was
 refined over the 2018 calendar year. This project will deliver a new information technology
 system to support the GTAC (\$4.5 million);
- Deferral of the physical enabling works for the Gilbert Stream realignment project to FY2019, due to the need to verify and optimise the design (\$7.9 million);
- Rescheduling the Warkworth lateral expansion project to the end of this DPP period, reflecting updated customer requirements (\$5.1 million); and
- Variation to the scope of Turakina River protection works to enable implementation of a better solution of the site at a lower cost (\$1.3 million).

Operational expenditure

Minor variances in operational expenditure relate to a number of one-off savings and improvements. Over the year, First Gas has been able to apply economies of scale, brought greater focus on gas transmission assets, and applied learnings from the amalgamation of the Maui and non-Maui transmission businesses under a single owner, and operating the pipelines as one coordinated gas transmission system.

Information relating to revenues and quantities for the disclosure year

16. In the box below, please explain reasons for any material differences between target revenue disclosed before the start of the pricing year in accordance with clause 2.4.1 and sub-clause 2.4.3(3), and total billed line charge revenue for the disclosure year as disclosed in Schedule 8.

Box 13: Explanatory comment relating to revenue for the disclosure year

Our line charge revenue of \$129.45 million is \$3.17 million (3%) above the target revenue of \$126.28 million. The main drivers of the increased revenue are:

- Increased customer over-run payments over the winter period;
- Capacity reservation increases; and
- Line charge revenue reported in the disclosure includes wash-up revenue relating to quantities from the previous regulatory control period. These were not included in the target revenue calculation.
- 17. If prices or price category codes (as applicable) have been changed in a disclosure year, please explain in the box below the effect of this on the allocation of quantities and revenues between connection types or contract types (as applicable) disclosed in Schedule 9d(ii) and Schedule 8.

Box 14: Explanatory comment relating to changed prices or price category codes

There have been no changes to price category codes, however prices were changed on 1 October 2017, in line with the DPP reset for 2017 – 2022.

For the 2018 disclosure period we have continued to operate under the Maui Pipeline Operating Code (MPOC) and the Vector Transmission Code (VTC) for the Maui and Non-Maui pipelines respectively. First Gas is working with the industry to put in place a single gas transmission access code (GTAC). Until this is in place we will continue to report schedule 9d separately for the Maui transmission and Non-Maui transmission systems.

The change of price does not affect the allocation of quantities between connection or contract types as disclosed in Schedule 8 and Schedule 9d(ii).

Network Reliability for the Disclosure Year (Schedule 10a)

18. In the box below, comment on network reliability for the disclosure year, as disclosed in Schedule 10a.

Box 15: Commentary on network reliability for the disclosure year

Incidents and interruptions

A total of 322 incidents were recorded on the transmission system during the 2018 disclosure period. Most of the incidents in this disclosure period relate to station equipment (leaks, venting and product control), natural gas odour reported in vicinity of pipelines and unauthorised work over the pipeline.

Incident numbers in 2018 were affected by a larger number of production station trips and off specification gas, compared to historic levels. Each incident of off-specification gas was relatively minor in nature and did not affect the quality of gas across the pipeline.

An interruption is a subset of incidents and occurs when gas supply to a consumer stops for at least one minute. There were no planned interruptions in this disclosure period. Two unplanned interruptions occurred at the Te Awamutu Delivery Point resulting in a loss of supply to the Fonterra Dairy factory. Both instances occurred during a storm in April 2018 when lightening damaged an instrument control system.

Curtailments

There were 62 curtailment events recorded in the 2018 disclosure period:

- 44 were curtailments caused by third parties. First Gas has no control over these curtailments and their number is affected by the number of production station outages, or mis-match between nominated and actual gas flows by system users;
- 2 were caused by equipment failure when lightning strikes damaged an instrument control system at the Te Awamutu Delivery point; and
- The remaining 16 were curtailments of nominations in line with established contracts. The number of curtailments is in line with previous years. Customers on the Non-Maui transmission system may nominate for additional supply above the guaranteed contract amounts based on the pipeline capacity. However, the ability of a customer to take additional gas is dependent on other users, and their contract arrangements allow for curtailment when the additional gas is unavailable. Individual contracts may also permit gas supply to be curtailed in the event a power interruption affects compressor station availability Curtailment provisions and procedures for the Maui network are described in section 15 of the Maui Pipeline Operating Code (MPOC).²

Compressor stations and performance

In Schedules 9a and 9b we have disclosed 24 compressors situated at 9 compressor stations. In Schedule 10a we have reported operating data for 20 compressors at 8 stations. The reason for the difference is that Schedules 9a and 9b account for all stations and compressors owned by First Gas, whereas Schedule 10 accounts for all stations and compressors currently operational.

The number of instances when a compressor was required but unavailable for service has increased in this disclosure period. The cause of this increase is primarily due to the Henderson compressors coming on line in 2017. These compressors rely on electrical supply. If the electrical supply fails, then the compressors may be unavailable when required.

First Gas is considering options to provide a back-up electricity supply in the event of an interruption on the electricity network.

Emergency events

There was one emergency event during this disclosure period. While completing repairs to one of the riser pipes at the Oparure Mainline Valve, a temporary sealing plug was fitted. This plug failed resulting in an uncontrolled gas release. The event was immediately reported to the First Gas control room by First Gas personnel who were on site when the event started. As First Gas personnel were

on site when the event started, the response time between notification of the event and personnel on site was zero minutes.

Insurance cover

- 19. In the box below, provide details of any insurance cover for the assets, including-
 - 19.1 The GTB's approaches and practices in regard to the insurance of assets, including the level of insurance;
 - 19.2 In respect of any self-insurance, the level of reserves, details of how reserves are managed and invested, and details of any reinsurance.

Box 16: Explanation of insurance cover

Insurance cover is in place for all assets in the gas transmission system, including policies for material damage, business interruption and contract works insurance.

Insurance costs are allocated to the Transmission business based on the businesses share of total RAB forecasts.

Amendments to previously disclosed information

- 20. In the box below, provide information about amendments to previously disclosed information disclosed in accordance with clause 2.12.1 in the last 7 years, including:
 - a description of each error; and 20.1
 - 20.2 for each error, reference to the web address where the disclosure made in accordance with clause 2.12.1 is publicly disclosed.

Box 17: Disclosure of amendment to previously disclosed information

No amendments are required.

² The MPOC is available on the First Gas website.

Company Name	First Gas Limited
For Year Ended	30 September 2018

Schedule 15 Voluntary Explanatory Notes

- 1. This schedule enables GTBs to provide, should they wish to
 - additional explanatory comment to reports prepared in accordance with clauses 2.3.1, 2.4.20, 2.5.1, and 2.5.2;
 - information on any substantial changes to information disclosed in relation to a prior disclosure year, as a result of final wash-ups.
- 2. Information in this schedule is not part of the audited disclosure information, and so is not subject to the assurance requirements specified in section 2.8.
- 3. Provide additional explanatory comment in the box below.

In completing this disclosure, First Gas has made two minor amendments to information after discussion with the Commerce Commission. These amendments are:

- Schedule 4: Adjusting the opening Unallocated RAB balance
 The opening Unallocated RAB balance has been adjusted as discussed in box 4 of the mandatory notes; and
- Schedule 5d: Comparing the effect of cost allocations

When comparing the change in cost allocations in Schedule 5d(iii), the CY-1 result is based on a 12-month period (October 2016 – September 2017) instead of the 2017 disclosure period. The 2017 disclosure period for the Non-Maui system covered the 15 months from July 2016 to September 2017, while the disclosure period for the Maui system covered the nine-month period from 1 January 2017 to 30 September 2017.

We have also received exemptions for how we report data to facilitate the merging of our two transmission businesses. These exemptions are:

Schedule 2: exemption from reporting ROI for the CY-1 and CY-2 periods.

In CY-1 our two transmission businesses were aligning to a September year end. They had different disclosure periods, with the Non-Maui disclosure covering a 15-month period and the Maui disclosure covering a nine-month period. In CY-2, the two systems had a different disclosure period. The Maui transmission system reported under a December year end, and the Non-Maui transmission system reported under a June year end. In both the CY-1 and CY-2 periods, merging the data would be difficult and not provide a reliable trend.

Tables 1 and 2 provide the 2016 and 2017 disclosed results for the two transmission systems.

Table 1: 2016 (CY-2) and 2017 (CY-1) disclosure results for the Maui transmission system

ROI	CY-2	CY-1
ROI-comparable to a post-tax WACC	6.13%	7.47%
ROI-comparable to a vanilla WACC	6.72%	8.02%

CY-1 refers to the period 1 January 2017 to 30 September 2017.

CY-2 refers to the period 1 January 2016 to 31 December 2016.

Table 1: 2016 (CY-2) and 2017 (CY-1) disclosure results for the Non-Maui transmission system

ROI	CY-2	CY-1
ROI-comparable to a post-tax WACC	5.86%	7.09%
ROI-comparable to a vanilla WACC	6.49%	7.63%

CY-1 refers to the period 1 July 2016 to 30 September 2017.

CY-2 refers to the period 1 June 2015 to 31 July 2016.

Schedule 4: the historical RAB roll-forward is summed from the previously disclosed results.

Section 4(i) requires that First Gas rolls forward the Regulated Asset Base (RAB) on an annual basis from 30 September 2014. However, from 2014 – 2016 the two separate businesses had different year ends and neither of them were September.

For the historic roll-forward of RAB, we have added the annual disclosed results together. No adjustment has been made for the different year ends (2014 - 2016) or the different disclosure period in 2017.

The merging of the two transmission systems into one disclosure was difficult to achieve whilst they are operated under two separate transmission access codes. In completing this disclosure, and after discussion with the Commerce Commission, First Gas has continued to complete separate demand schedules (Schedule 9d) for each system. This results in limitations to the usefulness of any ratios disclosed in Schedule 1 where energy demand (TJs) is used. As a result:

Schedule 1: ratios where demand is used are indicative only.

The Maui and Non-Maui transmission systems operated under separate access codes for the 2018 disclosure period – the Maui Pipeline Operating Code (MPOC) and Vector Transmission Code (VTC). This causes difficulties when trying to disclose demand on a single transmission system basis. Quantities are transferred between the systems under the codes, therefore adding the demand quantities together is not accurate. Therefore, all ratios where demand (TJs) is used as should be treated with caution and considered indicative of trends rather than a definitive result.

Schedule 9d: the Maui and Non-Maui transmission system are disclosed separately

As noted above, the Maui and Non-Maui transmission systems operated under separate access codes for the 2018 disclosure period. Quantities are transferred between the systems under the codes and adding the demand on both systems together in a single schedule would result in the over-reporting of demand. We have continued to disclose schedule 9d separately for the two transmission systems.

It is anticipated First Gas will operate under a single transmission access code from 1 October 2019.

Schedule 19 Certification for Year-end Disclosures

Clause 2.9.3

We, Philippa Jane Dunphy and Euan Richard Krogh, being directors of First Gas Limited certify that, having made all reasonable enquiry, to the best of our knowledge-

- a) the information, prepared for the purposes of clauses 2.3.1, 2.3.2, 2.4.20, 2.5.1 and 2.7.1 of the Gas Transmission Information Disclosure Determination 2012 in all material respects complies with that determination; and
- b) the historical information used in the preparation of Schedules 8, 9a, 9b, 9c, 9d, 10a, 10b and 14 has been properly extracted from the First Gas Limited's accounting and other records sourced from its financial and non-financial systems, and that sufficient appropriate records have been retained.

Date 28 February 2019	Date 28 February 2019

Independent Reasonable Assurance Report to the Directors of First Gas Limited and to the New Zealand Commerce Commission

Conclusion

We have concluded that, in all material respects, Schedules 1, 2, 3, 4, 5 (a-g), 6 (a-b), 7 and 14 (boxes 1 – 12) of the First Gas Limited Gas Transmission Information Disclosure Requirements Information Templates (the 'schedules'), have been prepared, in accordance with the Commerce Commission Gas Transmission Information Disclosure Amendments Determination (No. 1) 2017 – 14 June 2017 and the related Reasons Paper and Input Methodologies (together 'the determination') for the 12 months ended 30 September 2018.

As far as appears from an examination of them, proper records to enable the complete and accurate compilation of the schedules as at 30 September 2018, have been kept by First Gas Limited for the 12 months ended 30 September 2018.

As far as appears from examination, the information used in the preparation of the schedules as at 30 September 2018 has been properly extracted from First Gas Limited's accounting and other records and has been sourced, where appropriate, from First Gas Limited's financial and non-financial systems.

Information subject to assurance

We have performed an engagement to provide reasonable assurance in relation to First Gas Limited's schedules for the 12 months ended 30 September 2018.

Criteria

We have performed an engagement to provide reasonable assurance in relation to the Schedules 1, 2, 3, 4, 5 (a-g), 6 (a-b), 7 and 14 (boxes 1 - 12) prepared in accordance with the determination for the 12 months ended 30 September 2018.

Standards we followed

We conducted our reasonable assurance engagement in accordance with International Standard on Assurance Engagements (New Zealand) ISAE (NZ) 3000 (Revised) *Assurance Engagements other than audits or reviews of historical financial information* and Standard on Assurance Engagements SAE 3100 *Compliance Engagements*. We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our conclusion. In accordance with those standards we have:

- used our professional judgement to assess the risk of material misstatement and plan and perform the engagement to obtain reasonable assurance that the schedules are free from material misstatement, whether due to fraud or error;
- considered relevant internal controls when designing our assurance procedures, however we do not
 express a conclusion on the effectiveness of these controls; and
- ensured that the engagement team possesses the appropriate knowledge, skills and professional competencies.

How to interpret reasonable assurance and material misstatement

Reasonable assurance is a high level of assurance, but is not a guarantee that it will always detect a material misstatement when it exists.

Misstatements, including omissions, within the schedules are considered material if, individually or in the aggregate, they could reasonably be expected to influence the relevant decisions of the intended users taken on the basis of the schedules.

Use of this assurance Report

Our report should not be regarded as suitable to be used or relied on by any parties other than First Gas Limited and the New Zealand Commerce Commission in relation to section 2.8.1 of the determination for any purpose or in any context. Any party other than First Gas Limited or the New Zealand Commerce Commission who obtains access to our report or a copy thereof and chooses to rely on our report (or any part thereof) will do so at its own risk.

To the fullest extent permitted by law, we accept or assume no responsibility and deny any liability to any party other than First Gas Limited and the New Zealand Commerce Commission for our work, for this independent reasonable assurance report, or for the conclusions we have reached.

Our report is released to First Gas Limited and the New Zealand Commerce Commission on the basis that it shall not be copied, referred to or disclosed, in whole (save for First Gas Limited's own internal purposes) or in part, without our prior written consent.

Directors' responsibility for the schedules

The directors of the company are responsible for the preparation and fair presentation of the schedules in accordance with the determination. This responsibility includes such internal control as the directors determine is necessary to enable the preparation of the schedules that is free from material misstatement whether due to fraud or error.

Our responsibility

Our responsibility is to express a conclusion to the directors on the preparation and presentation of the schedules in accordance with the determination.

Our independence and quality control

We have complied with the independence and other ethical requirements of Professional and Ethical Standard 1 (Revised) issued by the New Zealand Auditing and Assurance Standards Board, which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

The firm applies Professional and Ethical Standard 3 (Amended) and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Our firm has also provided audit, other assurance and non-audit services to First Gas Limited. Partners and employees of our firm may also deal with First Gas Limited on normal terms within the ordinary course of trading activities of the business of First Gas Limited. These matters have not impaired our independence as assurance practitioners for this assurance engagement. The firm has no other relationship with, or interest in, First Gas Limited.
