

# IANZ

## Accreditation

### Assurance

**We have been accredited by IANZ. This means you can be assured we are competent at what we do.**

This is because IANZ accreditation provides independent, third-party recognition of the technical and scientific competence of professional organisations, such as testing and calibration laboratories, radiology services and inspection bodies.

### Reliability

IANZ accreditation is independent and globally recognised. IANZ accredited organisations undergo rigorous and regular assessment of all areas of their accredited technical operations, ensuring test and examination results and inspection reports are reliable.

Many technical organisations in New Zealand are accredited by IANZ, including more than 700 laboratories, radiology services and inspection bodies which, between them, produce millions of certificates and reports every year.

To have confidence your results are right, when you use one of these services look for the IANZ symbol to make sure the organisation is accredited.

### Competence

Gaining accreditation by IANZ means organisations like us and customers like you have independent assurance of:

- Competent, experienced staff
- Properly calibrated equipment
- Validated testing methods
- Internal and external quality control checks
- Effective systems and procedures

For more information, or to find an IANZ accredited laboratory, radiology service or inspection service, go to [www.ianz.govt.nz](http://www.ianz.govt.nz)
